Subject: antibiotics in animal feed
Auto forwarded by a Rule

I am writing to express my concern about antibiotics routinely given to animals that are part of our food source. I have 4 children and do not want them growing up in a world where bacteria become immune to drugs, and where people suffer and die because there is no medicinal cure. I think our health as individuals and as a nation should always be the first priority in matters of food production. Unfortunately, personal wealth and profit has been the goal for too long. It is time to switch our mentality from personal gain to overall well-being. Please do what you can to stop the use of antibiotics in animal feed.

Most Sincerely,
Karin Thomas
